FINANCIAL NOTES.

FINANCIAL AND COMMERCIAL.

New York, Oct. 13.

The security market to-day provided change and variety enough to stir the most hardened speculator. It opened weak under the continued shock of the bad bank statement of Saturday, and of the disagreeable influence exerted upon all business by the coal strike. Decidedly lower quotations came from the London market. Liquidation was pronounced, many holders of stocks in commission houses who had previously been firm in their declared intention "to see the market through" closing their accounts in disgust, while others were forced to sell investment securities on peremptory calls for margins. The pools still in existence sold right and left, as did a host of operators for the decline. The market broke from one to five points in the active stocks, the extreme drop taking place in Missouri Pacific, which sold at 102½, as against 107½ at Saturday's close. Union Pacific and Amalgamated Copper were particularly strong, there seeming to

becoming too bearish, and that not sufficient account was taken of the fact that those overloaded houses whose operations had been a source of danger had now jettisoned their cargoes pretty thoroughly. There was a disposition, also, to revise somewhat the adverse judgment passed upon Saturday's bank statement. Attention was considerably directed to the fact, hitherto emphasized in this column, that as the weekly bank statement is compiled without reference to the large operations conducted in this market by out-of-town banking institutions, the Saturday's Clearing House sheets, therefore, are apt at present, by not showing the reduction in loans made by out-of-town banks, to display the financial situation as much worse than it really is, just as during the summer they did not disclose in any degree the very great expansion in loans and consequent impairment of financial strength that was going on. In the late afternoon a rumor obtained credence in the best houses in the Street that a settlement of the coal strike was at last imminent, and while these rumors have often prevailed in the past and have been found to represent merely the dreams of misguided speculators, it must be admitted that in the present instance they give ground for hope. One way of proving the sincerity of Mr. Mitchell's declaration that all that he and the striking miners are concerned with in their present effort is to obtain an amelioration of the conditions under which they labor would be for the coal operators to offer to the men individually a good advance in wages, the union being neither recognized nor repudiated. It may be the operators have decided upon some such course. That a satisfactory adjustment of the great difficulty in the anthracite region-by a satisfactory adjustment being meant one that would insure against the recurrence of the difficulty in at least the near future and at the same time leave invio late the great principles of property rights involved -would result in a decided stimulus o security prices is undoubted. The money stringency would still, of course, have to be reckoned with, but the fear that has begun to agitate many investors of a pro-digious general conflict between capital and labor and of the civil turmoil and political changes that it would entail would be removed. In the last hour of business on the Stock Exchange, prices, moved by these considerations, rallied so sharply that they the day, and the Wall Street community went home feeling more cheerful, even although only in a vague way, than it has for a long time. A very gratifying piece of news was that of the increase in the country's export trade for September. At last there is an intercuption of the decreases in The exports for the month increased nearly The defendants failed to put in an answer \$8,000,000 over those of the same month or to demur and the matter was referred to last year, the gain being chiefly in exports George B. Abbott to compute the amount of cotton, these increasing in value \$13. 431,351. They were offset by a decrease in the value of exports of provisions and mineral oil, but left a net gain for the month

The market steadied after the first weakness, but did not rally any, and then upon the rise in call money rates to 20 per cent. renewed liquidating and bear sales again appeared, pressing prices to lower levels than have hitherto been reached and, in some instances, to the lowest figures of the year. As has been noticed, however, on several previous occasions, the older and more experienced "bears" are careful at present about pressing their operations too far, and just at the time when the rank and file of speculators in commission houses were bewailing the lack of resiliency in the market bewailing the lack of resiliency in the market search additional blow was dealt it, these leading "bears" began to cover their outstanding contracts. The rates for money fell off to 10 and even to 6 per cent, and loaned freely throughout the afternoon at lower rates. Comments were made upon the extent and rapidity of the decline in prices in the last two weeks and talk was again heard that speculators generally were becoming too bearish, and that not sufficient Total sales of bonds (par value), \$4,531,000.

There was an early deciline in cotton, owing to a fail in Liverpool of 14 to 16 American points, liberal receipts, generally lavorable weather: a break in the stock market, the continuance of the coal strike and a dribbling out of long cotton, but later on there was a rally, owing to a recovery at the Stock Exchange and reports that renewed efforts are to be made to settle the coal strike. Moreover, cooler weather was predicted for the northern sections of Texas, Arkansas and Oklahoma, and the exports were on a large scale, reaching 52,376 hales. There were reports of light frosts in Mississippi, Alabama and Arkansas. The Wall Street bull clique were believed to be good buyers of March during the day. Letohatchie, Ala., Oct. 10.— I would to God these English 'bears' were here to day. It is raining and cold and all of the big ginneries have closed down. The cotton crop is gathered. This date last year (as a seed shippers I had shipped 9 cars. This year so far I have shipped 38 cars, all of minimum No. 40.000. Everyone has the blues grocery bills unpaid, and it looks like 'Sunday.' If our horothers elsewhere are not making cotton, it is a foregone conclusion that the crop is practically gathered. I rode out in the fields day before yeserday with a friend ione of the largest planters in the country who had spent \$15 per acre in cotton seed meal and other fertiligers, and he remarked. Well, it's all over. I won't get enough to pay for what I have expended in the way of fertilizer, to say nothing of all other expenses."

The ton corror business is all a 'fake,' none of the boils will open; recent cold winds and nights have paralyzed them and in many listances the crop has been abandoned and 'stock turned out.' I mean by this that farmers have given up the top crop—A. J. Jenvins.'
